

Effective Behavioral Interventions and Public Health Strategies (EBIs & PHS) Resource List

Effective Behavioral Interventions and Public Health Strategies (EBIs & PHS) are an integral part of reducing the spread of HIV in our communities. Capacity for Health works closely with staff at community based organizations (CBOs) to ensure that they have the knowledge, tools and skills to successfully implement these interventions with fidelity. Below is a brief list of some of the EBIs & PHS resources that we have found to be helpful in our capacity building assistance. Note that we do not financially benefit from the purchase of any of these materials.
