

IF THE AFFORDABLE CARE ACT IS REPEALED

2 million Asian Americans, Native Hawaiians and Pacific Islanders WILL LOSE COVERAGE

The Affordable Care Act (ACA) has substantially improved access to both coverage and care for 20 million Americans, including millions of Asian Americans, Native Hawaiians, and Pacific Islanders (AA and NHPI). These coverage gains benefit the entire nation, providing life-saving care and financial security for those who would otherwise have no or limited coverage.

There are
20,416,808
Asian Americans
in the U.S.

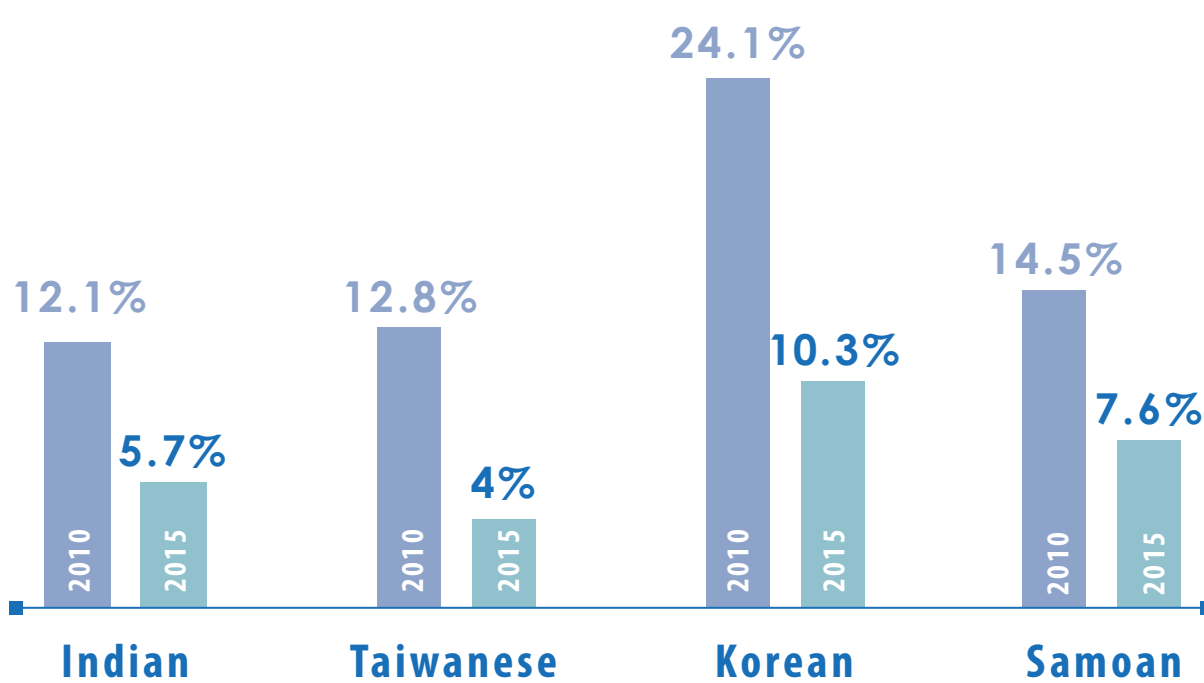

There are
1,314,433
Native Hawaiians and
Pacific Islanders in the U.S.

WHAT'S AT RISK?

Since the ACA's passage, the uninsured rate for AAs and NHPIs has dropped.

Disparities in who is uninsured differ, but all groups have benefited from the ACA

The ACA has made healthcare more affordable.

8 in 10 previously uninsured AAs and NHPIs are eligible for financial assistance (tax credits, Medicaid or CHIP)

The ACA protects people with pre-existing conditions and provides 8 million AAs and NHPIs with free preventive care.

Indian Americans have **diabetes** compared to 7.1% of Whites

People living with **Hep B** are **AA and NHPI**

Vietnamese women have **cervical cancer** rates **5x higher** than White women

Consumers now have access to free screenings for diabetes, Hep B and cervical cancer.

Tell Your Senators to #ProtectOurCare!

The US Senate has created its own ACA repeal bill and we expect major cuts to financial help that make health coverage less affordable and end Medicaid as we know it. Call your Senators and tell them healthcare matters to Asian American, Native Hawaiian, and Pacific Islander communities and to **vote NO on repeal or cuts to the ACA or Medicaid.**

1 Call: 1-888-200-5389

2 Ask to speak with your Sentaor.

3

Say: "I oppose the plan to end the Affordable Care Act and ask that you vote against the bill and protect my care."
